## DE JAGER'S GOLD MEDAL

### Large flowering Gladiolus

Gladioli are now greatly favoured flowers and need no lengthy description. The improved strain of these magnificent flowers produce enormous spikes with very large strikingly coloured blooms of enchanting beauty. They have a very commanding appearance in borders and in groups among shrubs where they remain in bloom for a considerable length of time. They are also excellent as cut-flowers.

**Culture:** Plant Gladioli 3 to 4 inches deep and 5 to 6 inches apart in a well drained and good garden soil from the beginning of March, at intervals, until the middle of May, in order to have a succession of blooms from July until early autumn. Do not add fresh manure. Gladioli like a sunny and sheltered position. It is advisable to change the location of Gladioli-plantings every year.

The prices quoted are for Topsisize corms.

1. Early                      2. Mid-season                      3. Late season.

Gladiolus Butterfly

There is a great interest for small flowering Gladioli and the Primulinus hybrids have been for a long time the most popular varieties for cutting and flower arrangements. We are now able to introduce a new race of dwarf varieties under the name "Butterfly Gladioli". These produce little open florets and are characteristic for their remarkable vivid markings in the throat. In fact, they are of a more stronger habit, producing more open florets on a spike and are of long lasting qualities.

# DAHLIAS (Tubers)

Dahlias are the royal representatives of the summer season and they are known all over the world as decorative garden plants. They have shown a remarkable increase in public favour in recent years because so many new and better varieties have been raised. Rich tints in every design of colour and strong stems make them invaluable for cutting as well as for garden purposes.

We are able to offer the following list of very choice and rare Dahlias, which should be of special interest to the real connoisseurs and fanciers. The roots offered are all top size and can be planted from the 15th of April until the end of May. They are very easy to grow and do not need any special treatment although they want a sunny position in the garden and some bone-meal is recommended.

Dec. = Decorative; S.C. = Semi Cactus; C. = Cactus.

## Royal Dutch Amaryllis

(Hippeastrum)

The Amaryllis produce huge Lily-like flowers and with their unique beauty and grace they give immense pleasure and satisfaction. The three or four funnel-shaped florets are placed on the top of a tall solid stalk and grow about eight to ten inches wide at mouth. This genus has several qualities combined and its shades are most exquisite and lovely.

The Amaryllis can be had quite easily in bloom when placed in a warm spot in the livingroom with normal indoor temperature. Remember the base of the bulbs should be kept warm to stimulate the development of the roots.

**Choice Seedlings Mixture**, certain to give entire satisfaction because of their large blooms of breathtaking beauty, the shades being mainly red. They deserve a much larger popularity and to encourage their cultivation, they are offered at a special price.

Large bulbs: **\$ 3.00 each; \$ 8.50 per 3**

Acidanthera Murielae

(Abyssinian Wildflower)

A richly scented flower that has all the characteristics of the Gladiolus family, though the silver-white florets are of quite a different habit and show in the centre a large deep maroon purple blotch.

They grow to a height of 2 to 3 feet and are of an extremely graceful appearance. During the winter the corms of the Acidanthera Murielae require storage in a warm, dry place.

Plant after 15th of April 3 inches deep and 5 inches apart, they take a long time to develop and do not flower much before September.

Acidanthera Murielae (See illustration.)  
60 cts. per doz.; \$ 4.00 per 100

Superb Begonias

This Genus deserves attention because of its great value for planting in any position of the garden. From June and onwards, these so often lost spots, will be brightened by the Tuberous Begonias with their huge flowers of magnificent bright and pastel colours.

**Culture:** The best method is to start them in a cold frame. Plant in rich soil. Good drainage is essential and water cautiously until plants have shown considerable growth, then increase supply. When a little hardened off and when nightfrosts are no longer expected they should be planted out in the garden. Begonias can be planted either single or in beds one foot apart.

# Lilies

High Quality Dutch Grown  
Bulbs, Free from Virus

The Lily stands pre-eminent for its beauty, grace and performance and is not particularly difficult to grow, it may be left undisturbed for years while it increases in richness and display.

**Culture:** Lilies must not be allowed to dry out, but should be planted immediately on arrival at a depth of three times the height of the bulb in a well-drained light loamy soil. No Lilies will thrive in full shade. The first season after planting Lilies may not flower profusely, but once established, they increase in richness and display. Cutting the dead stems in autumn is essential for good results the following year. Add a fresh top-dressing of old well decayed manure and rotted leaf-mould in early spring.

\$ 1.00 each; \$ 2.50 per 3

## Lycoris

(Hardy Amaryllis)

Very similar to Amaryllis and Nerine, they are often regarded as greenhouse bulbs, but are certainly as hardy as Tigridias and do very well in the South in sandy soil and warm spots. Cover with ashes or litter during winter as protection; the bulbs establish themselves for blooming for years.

**squamigera**, sweet heads of lovely pink flowers on 2 feet stems, the most charming and rarest of the species. Flowers in August.

60 cts. each; \$ 1.60 per 3; \$ 6.00 per doz.

## Montbretia

Large flowering varieties only

These magnificent **New Montbretias** are a great improvement on the older varieties being taller and more robust, while the flowers are of much greater size and beauty, some of them measuring 3 inches across. These lovely flowers with their elegant and branched spikes are not only good cut-flowers, but they are also charming as garden varieties, their vivid, warm orange colourings give the most effective result during August/September when planted in groups from 6 to 12 in the border.

**Culture:** It is absolutely necessary to give them a sunny place and a well drained position. The best time for planting is during March and April at a depth of at least 3 inches and 2 inches apart. They like a deep well-drained loamy soil enriched with leaf mould. Can be left undisturbed for years.

Montbretia mixed

**James Coey**, this lovely Montbretia is of stately grace, the elegant deep orange-red flowers are carried on a tall and wiry stem. A variety of a very charming character and unusual colour. **90 cts.** per doz.; **\$ 6.50** per 100

**Lady Oxford**, a perfectly formed variety, broad overlapping flowers, intense orange with a shade of pink on petals. A variety we personally admire and regard as outstanding in colour. **90 cts.** per doz.; **\$ 6.50** per 100

**Lady Wilson**, one of the best of its class, uniform bright orange flowers of an immense size and perfection, carried on a strong and tall stem. Colour, size and form not approached by any other Montbretia. **90 cts.** per doz.; **\$ 6.50** per 100

**Rheingold**, pure yellow and recommended as the purest variety in its class, with beautifully formed flowers, placed nicely on a strong stem. **\$ 1.00** per doz.; **\$ 7.00** per 100

**Rosea** (Tritonia Rosea), the only rose variety under cultivation producing attractive soft rose flowers, very distinct. **80 cts.** per doz.; **\$ 5.50** per 100

**SPECIAL COLLECTIONS OF LARGE  
FLOWERING MONTBRETIAS**

**80 cts.** per doz. **\$ 5.50** per 100

**Emily McKenzie**, we believe that this one is the best and most interesting introduction of recent years with beautiful pure orange flowers, brownish red markings around orange-yellow centre. Large saucer-shaped flowers are carried on strong stems. F.C.C. Haarlem 1958.  
**90 cts.** each; **\$ 9.00** per doz.

Nerine Crispa

## Nerine

(Guernsey Lily)

Lovely South Africa plants with strap-like leaves and splendid umbels of flowers in autumn. For autumn decoration few plants can compare with the Nerine for their brilliant and attractive colour.

**Bowdeni**, one of the most attractive, possibly the hardiest of the Nerines lovely soft pink umbels flowering on 18 in. stems in September. **90 cts.** each; **\$ 2.50** per 3

**Crispa** (syn. undulata), a very beautiful species with rose-pink flowers, the edges of petals elegantly waved. Can be excellently used for planting outdoors. (See illustration page 34.) **40 cts.** each; **\$ 4.00** per doz.

## Ornithogalum

(Chincherinchee)

**Ornithogalum thyrsoides**, (Chincherinchee) a common hedgerow plant in the Cape of Good Hope. The native name chincherinchee is an onomatopoeia one, describing the sound which the breeze makes as it blows through the dried flower stems. It produces long fleshy leaves and a large umbel of pure white, brown-based flowers on a stout 12/18 in. stem in May-June. The best time for planting is April at a depth of at least 3 in. and 3 in. apart. They like a deep well-drained soil and a warm sunny spot in the garden. It is also splendid as a cold greenhouse flower and the blooms last remarkably when cut. (See illustration.)

**Ornithogalum thyrsoides**

**85 cts.** per doz.; **\$ 6.00** per 100

**Saundersae**, a spectacular and extremely uncommon species from the Cape known as the giant summer Ornithogalum. From handsome rosettes of leaves stems rise up to five feet high with great clusters of creamy-white flowers with olive black centres, which open successively over a very long period, for months. Lasts ages when cut; like a dry sheltered situation. Treat exactly as the large Gladiolus, lifting and replanting annually. **\$ 1.00** each; **\$ 10.00** per doz.

## Oxalis

**Deppei** (syn. Tetraphylla), pretty deep rosy-red blossoms with clover-like leaves curiously marked with bands of purple; it is called "The European Lucky Clover" or "The American Shamrock". Plant 2 to 3 inches deep in a sunny position. **35 cts.** per doz.; **\$ 2.00** per 100

**floribunda** (rosea), the dazzling pink form of the common cottage Oxalis, looks very lovely.

**50 cts.** each; **\$ 5.00** per doz.

**Lasiandra** (Mexico), a most lovely little plant with beautiful leaves, holding an attractive rosy-crimson flower-head on a 9 inch stem; very uncommon. **50 cts.** per doz.; **\$ 3.50** per 100

## Polianthes tuberosa

The exquisite and rightly famous intoxicating scented tuberosa with 3 feet spikes of single or fully double creamy-white, flowers in autumn. A beautiful greenhouse plant or may be potted and planted out in a warm sunny border in summer. **40 cts.** each; **\$ 4.00** per doz.

## Ranunculus Asiaticus

They thrive in any ordinary garden soil where some slight protection from cold winds in spring is available. Plant Turban-, Persian- and Peony-flowered as early as possible in spring and the French from February/March. Set claws downwards and press firmly into the soil. It is most important to plant very shallow, not more than 2 inches deep, when planted in the autumn they require some covering during winter.

**Peony flowered Ranunculus Grandiflora mixed colours.** One cannot really appreciate the bold and brilliant beauty of this new strain of Peony-flowered Ranunculus until having planted some patches in the garden to see the wonderful new colours of this long-stemmed and very free flowering new race. It almost contains all colours of the rainbow. Flowering May-July, height 10-14 inches.

65 cts. per doz.; \$ 4.50 per 100

**Turban Ranunculus mixed colours.** Produce large rose-shaped flowers in a great range of colours.

50 cts. per doz.; \$ 3.50 per 100

**Persian Ranunculus mixed colours.** A very fine mixture similar to the Turban section, but blooms just in between the Turban and French sections.

50 cts. per doz.; \$ 3.50 per 100

**French Ranunculus fine mixed colours.** Flowers are a little smaller than the other groups, but are very full double and have a wide range of beautiful colours.

50 cts. per doz.; \$ 3.50 per 100

**Sprekelia formosissima**

## Richardia

(Calla Lily, Zantedeschia)

These have gained great popularity and are indeed magnificent flowers for decorative purposes and they can be easily grown in pots.

**Albo maculata**, delightful small creamy-white flowers over bright green white-spotted leaves, extremely useful for potculture.

75 cts. each; \$ 2.00 per 3

**Elliottiana**, beautiful dark golden-yellow flowers, a very striking plant for the greenhouse or conservatory, strongly recommended.

\$ 1.50 each; \$ 4.00 per 3

**Rehmanii**, the very attractive pink coloured Arum from Natal, grows quite easy in pots, different from others having narrow, arrow shaped leaves.

\$ 1.50 each

**Solfatare**, a very attractive hybrid (Elliottiana × Aethiopica), large sulphur yellow flowers with slightly spotted leaves. Very free flowering and easy to grow in greenhouse or sheltered place in the garden.

75 cts. each; \$ 2.00 per 3

**Seedlings**, a grand mixture of well-formed flowers in different shades of primrose yellow, sulphur to deep yellow, many of them beautifully marked with purple blotches in throat and all with more or less mottled leaves.

75 cts. each; \$ 2.00 per 3

## Sparaxis Hybrids

(Specially prepared for summer flowering)

A very attractive dwarf little bulbous plant of the same habit as Ixias. The flowers are even larger in size and produce a fascinating combination of colours rarely seen in any other race of bulbs or plants. The colours range from salmon-orange to rosy-lilac and scarlet-red to creamy-white. They are particularly suitable for the rock- and Alpine-garden.

50 cts. per doz.; \$ 3.50 per 100

## Outdoor Freesias

Freesias are well known for their fascinating pastel colours, fragrance and unsurpassed beauty for indoor decoration. While it was formerly possible to grow them in a greenhouse only, through certain preparations they can now be planted in the garden with great success.

Plant towards the end of April about 2 inches deep and 2 inches apart in a well-drained, good loamy soil and give them a sunny position. The outdoor Freesias flower from the end of July to late autumn, they have long lasting qualities and are strongly scented.

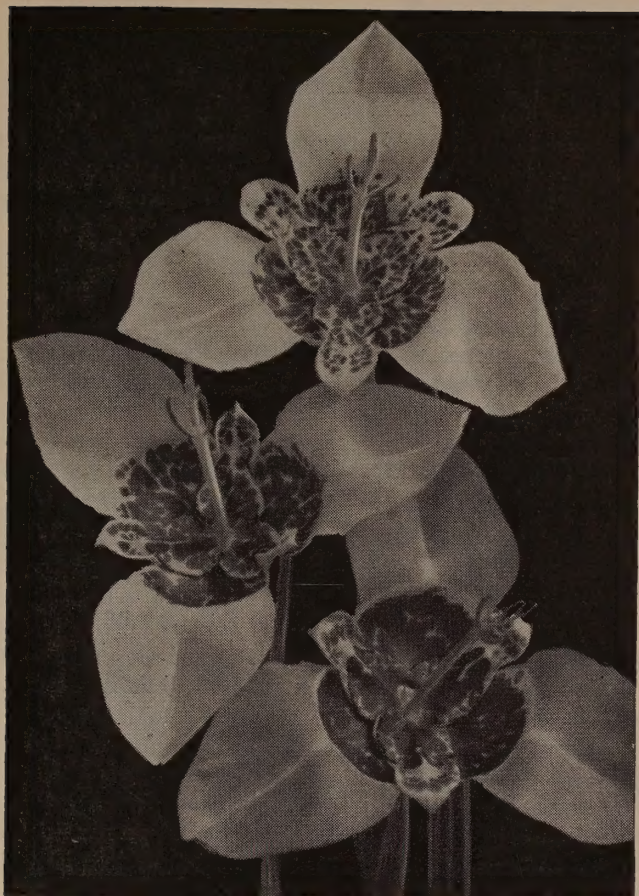

**Mixed Colours** . . . . . 65 cts. per doz.; \$ 4.50 per 100

**Lilium Fire King** (see page 30)

### Tigridia

**Aurea**, dark yellow.

**Giant Rouge**, pale carmine with large spotted centre.

**Grandiflora alba**, large white.

**Lilacina**, pure lilac, very outstanding.

**Lutea Immaculata**, pale yellow with large centre.

**Pavonia Speciosa**, dark carmine-red with pale centre.

**Choice Mixture.** To encourage the cultivation of this very interesting little plant, we offer a very fine mixture which will be much admired when in flower. (See illustration.)

85 cts. per doz.; \$ 6.00 per 100

70 cts. per doz.; \$ 5.00 per 100

## Zephyranthes

Magnificent flowers of the most noble and startling kind from South-America. They flourish out of doors in a sunny warm spot of the garden and do easy and brilliantly in a cold greenhouse.

**candida** (The Flower of the West Wind), producing in autumn a profusion of white Crocus-like flowers, valuable for permanent edging, masses, etc., height 8 in.: likes a sunny situation and an enriched sandy soil with plenty of moisture; it should be allowed to remain undisturbed for years. (See illustration.)

85 cts. per doz.; \$ 6.00 per 100

**rosea**, a remarkable beautiful variety, flowers are of a full soft rose-pink with white centre and golden anthers, height 6 to 8 in.

\$ 1.00 per doz.; \$ 7.00 per 100

**Zephyranthes candida**

## Sprekelia

(Scarlet Jacobean Lily)

**formosissima** (syn. *Amaryllis formosissima*), exquisitely shaped brilliant crimson-red flowers enclosing a bunch of golden stamens in throat. A beautiful bulbous plant from Mexico, flowering in June on a 1 foot stem. (See illustration page 36.)

\$ 1.00 each; \$ 2.50 per 3

## Tigridia (Ferraria)

Very few flowers are more picturesque coloured or so beautiful. The bulbs should be planted in April, about 2 inches deep and 4 inches apart, in rich well-drained soil and in a sunny position. After the flowering period in July and August they should be lifted and stored during winter in a dry place, carefully preserved from frost and mice, the latter are particularly fond of them.

# Perennial Plants

(a selection of the most popular and successful plants)

The hardy Perennials are the backbone of the garden and will live and bloom for years with a minimum of care. They grow and bloom in their season and die down for another winter's rest, they come up again in spring and give forth during the season their beautiful effects of foliage and flowers.

## Agapanthus (Blue African Lily)

**Umbellatus**, deep azure blue umbel of flowers on a strong stem, likes a rich soil and a sunny position.  
\$ 1.25 each; \$ 3.00 per 3

## Artemisia (Sage Brush)

A beautiful silver foliage plant, presenting a frosty appearance. Growing about 2 feet tall. Should be planted in a sunny location with the tips of runners above ground level. Foliage makes attractive background for cut-flower arrangements.
